

DolphinExam - Digital Examination and Analytics Platform

Radically different from traditional examination style, DolphinExam platform provides a whole new user experience centered on the interaction between educator and learner. Its user-centric design and unique analytic technique enable instructor to establish a variety of exam styles. Moreover, its cross-analysis technique allows instructor to assess students' learning status immediately after the examination. DolphinExam also permits students to learn, to review the records and to take the exam regardless of location. Via DolphinExam, our learning activity is no longer constrained by location. It is a platform that revolutionizes our way of learning, highly accelerates the learning speed and betters our knowledge management ability.

InfoPower

Feature:

Convenient Way of Examination:

With our extensive understanding of testing process on mobile devices, we are able to provide a brand-new, elegant UI interface with various visual interactions that greatly furthers user experience.

Cross-Device/Platform Examination

It enables students to conduct the exam via different devices and platforms.
