Daily News

Scientists 'Stunned'

When exploring the ocean floor you might expect to see lots of sand and shells. But what if you were to find a tusk of a woolly mammoth? Scientists have just discovered a rare tusk of a woolly mammoth on the ocean floor. The tusk was found in a deep-sea trench. It was found in a trench that is 10,000 metres deep. The tusk was found in a trench that is 10,000 metres deep. The tusk was found in a trench that is 10,000 metres deep.

Questions
